The preparation of unconsolidated condensed interim financial statements require management to make judgements, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets and liabilities, income and expenses. Actual results may differ from these estimates.

In preparing these unconsolidated condensed interim financial statements, the significant judgements made by management in applying the Company's accounting policies and the key sources of estimation and uncertainty were the same as those that applied to the audited annual financial statements for the year ended June 30, 2023.

12.2 Fair value of financial instruments

Carrying values of the financial assets and financial liabilities approximate their fair values. Fair value is the amount for which an asset could be exchanged, or a liability settled, between knowledgeable, willing parties in an arm's length transaction.

12.3 Fair value hierarchy

The carrying value of all financial assets and liabilities reflected in the financial statements approximate their fair value.

The table below analyse financial instruments carried at fair value, by valuation method. The different levels have been defined as follows:

Level 1. Quoted market price (unadjusted) in an active market for identical instrument.

Level 2. Inputs other than quoted price included within Level 1 that are observable for the asset or liability, either directly (i.e., as prices) or indirectly (i.e., derived from prices).

Level 3. Inputs for the asset or liability that are not based on observable market data (unobservable inputs).

The main level of inputs used by the Company for its financial assets are derived and evaluated as follows:

	Level 1	Level 2	Level 3
	----- Rupees -----		
As at March 31, 2024			
Assets carried at fair value			
Equity instruments at fair value through OCI	6,509,199,825	-	500,000

As at June 30, 2023

Assets carried at fair value

Equity instruments at fair value through OCI	3,991,135,084	-	500,000
